

Overview: This is a kind of music platform for listening and adding some custom effects. For example, if you would like to add your favourite sound effect, while listening remix, you can just click the button or hit keyboard shortcuts.

If you drag the mouse on this area right and left, the sound speed changes faster and slower

You can just click on the instrument, then sound effects will run.

Enjoy.

If you drag the mouse on this area up and down, the soundeffect changes lower and loader

Those are the shourtcuts for musical instrument
